

Step 1: Open Windows Defender Firewall with Advanced Security

1. Press **Windows + R**.
2. Type:

`wf.msc`

3. Press **Enter**.
-

Step 2: Open Outbound Rules

1. In the left panel, click **Outbound Rules**.
 2. In the right panel, click **New Rule...**
-

Step 3: Select Rule Type

1. Select **Program**.
 2. Click **Next**.
-

Step 4: Select the Spotify Executable

1. Choose **This program path**.
2. Click **Browse**.
3. Locate the Spotify executable.

Common locations are:

Standalone installer version:

`C:\Users\<YourUserName>\AppData\Roaming\Spotify\Spotify.exe`

4. Select **Spotify.exe**.
 5. Click **Next**.
-

Step 5: Block the Connection

1. Select **Block the connection**.
2. Click **Next**.

Step 6: Apply the Rule

Keep all profiles checked:

- ✓ Domain
- ✓ Private
- ✓ Public

Click **Next**.

Step 7: Name the Rule

For example:

Block Spotify Outbound

Click **Finish**.

Step 8: Verify

1. In **Outbound Rules**, confirm that **Block Spotify Outbound** appears and is **Enabled**.
2. Open Spotify.
3. Try to play a song. If the rule is working, Spotify should not be able to connect to the internet.
