

	HDD (Hard Disk Drive)	SSD (SATA SSD)	NVMe SSD
Storage Technology	Mechanical spinning disks and read/write head	Flash memory, no moving parts	Flash memory using PCIe interface
Speed	Slowest (80–160 MB/s)	Faster (400–550 MB/s)	Fastest (2,000–7,000+ MB/s)
Cost per GB	Lowest	Medium	Highest
Performance	Best for storing large amounts of data	Good for everyday computing	Excellent for demanding tasks and multitasking
Daily App / Use Case	Media storage (movies, photos, backups)	Google Chrome – faster startup and browsing	Adobe Premiere Pro – faster editing and rendering
Key Benefit	Large capacity at low cost	Quick boot times and responsive applications	Ultra-fast loading, file transfers, and heavy workloads
