

| SSD(Solid state Drive) |                                                    | HHD(Hard Disk Drive)                                                |
|------------------------|----------------------------------------------------|---------------------------------------------------------------------|
| Speed                  | 500MB/s to 7000MB/s much fast read/<br>Write speed | 80MB/s to 160MB/s slow read/write speed                             |
| Boot Time              | 10 to 15 seconds startup time                      | 30 to 60 seconds startup time                                       |
| Durability             | More Durable No Moving Parts                       | Less Durable Spinning Magnetic Platters are Damage                  |
| Power Consumption      | Uses Less Power And save Battery                   | Uses More Power Compared to SSD                                     |
| Storage Capacity       | Very Large capacity at lower Price                 | More expensive per GB and Though capacities<br>Continue to increase |
| Cost                   | Higher Cost                                        | Very Affordable                                                     |
| Typical Use Cases      | Laptops, Gaming Pc, Ultrabook                      | Desktop Backup drives, Bulk Storage                                 |
