

Packet Chosen: TCP SYN Packet (Destination Port 443)

TCP/IP Layer: Transport Layer

How I Identified It:

I identified this packet because the **Protocol** column shows **TCP**, and the packet details display **Transmission Control Protocol** with source port **52684** and destination port **443 (HTTPS)**.

Real-World Action:

This packet represents my browser starting a secure connection with the Flipkart server after I refreshed the homepage. The TCP SYN packet is the first step in establishing a connection before the website can load.
