

Q-List three real-world examples of popular apps or services (like IRCTC, WhatsApp, or Zomato) that rely on WAN connections, and briefly describe how WAN enables their functionality.

App/Service	How WAN Enables Its Functionality
IRCTC	WAN connects users across India to IRCTC’s centralized servers, allowing them to search trains, check seat availability, book tickets, and make payments online.
WhatsApp	WAN allows smartphones to communicate with WhatsApp’s servers over the Internet, enabling users to send messages, photos, videos, voice notes, and make calls worldwide.
Zomato	WAN connects customers, restaurants, delivery partners, and Zomato’s servers, allowing real-time order placement, payment processing, restaurant updates, and delivery tracking.
