

Q-Research online and find an image or datasheet of a physical WAN aggregator device used in enterprise networks. Paste the image or link, and write two key features of that device.

Device: Cisco ASR 1000 Series Aggregation Services Router. Cisco describes it as an enterprise WAN-edge platform that can aggregate multiple WAN connections and network services.

Two key features:

1. **High-speed WAN aggregation:** The ASR 1000 series supports aggregation of multiple WAN connections, with platform throughput ranging from **2.5 Gbps up to 200 Gbps**, depending on the model.
2. **Integrated security and services:** It supports services such as **encryption, NAT, firewall functions, traffic management, and SD-WAN**, allowing enterprises to handle WAN connectivity and security on the same platform.
