

Here are the **easiest step-by-step instructions** to create the project in **Cisco Packet Tracer**.

Step 1: Open Cisco Packet Tracer

- Launch **Cisco Packet Tracer**.
 - Click **File** → **New** to create a new project.
-

Step 2: Add Three PCs

1. At the bottom-left, click **End Devices** (PC icon).
 2. Select **PC**.
 3. Click on the workspace **three times**.
 4. You should now have:
 - PC0
 - PC1
 - PC2
-

Step 3: Add a Wireless Router

1. Click **Network Devices**.
2. Click **Wireless Devices**.
3. Select **Wireless Router** (for example, **WRT300N**).
4. Click on the workspace to place it.

Step 4: Connect the PCs

Option A (If your assignment just says "connected appropriately")

Use **Copper Straight-Through** cables.

1. Click the **Connections** (lightning bolt) icon.
2. Select **Copper Straight-Through**.
3. Click **PC0** → **FastEthernet0**.
4. Click the **Wireless Router** → **Ethernet 1**.

Repeat for:

- PC1 → Ethernet 2
- PC2 → Ethernet 3

Save the file as HomeWiFiNetwork.pkt
