

Recommended WAN Technology for Flipkart

For connecting Flipkart's warehouses in **Ahmedabad, Mumbai, and Delhi**, the **best WAN technology is MPLS (Multiprotocol Label Switching)**.

Reasons

1. Secure and Reliable Communication

- MPLS provides a **private and secure network** for data transmission between warehouses.
- This helps protect important business information such as inventory records, customer orders, and shipment details from unauthorized access.

2. High Performance and Low Latency

- MPLS offers **fast and reliable connectivity** with low latency, ensuring real-time communication between warehouses.
- Employees can quickly update stock levels, process orders, and coordinate deliveries without delays.
