

Q-Use FileZilla Client to connect to your FTP server using the credentials you created, and upload any image file from your computer to the shared folder.

Step 1: Open FileZilla Client

Launch **FileZilla Client** on your Windows computer.

Step 2: Connect to Your FTP Server

Enter the credentials you created earlier:

Field	Value
Host	127.0.0.1 (or localhost)
Username	student
Password	Student@123
Port	21

Click **Quickconnect**.

If the connection is successful, you'll see:

- **Left panel:** Your local computer files.
 - **Right panel:** The contents of the FTP shared folder (C:\FTPShare).
-

Step 3: Locate an Image

In the **left panel**, browse to any folder containing an image, for example:

- C:\Users\<YourName>\Pictures
- Downloads

Select an image such as:

photo.jpg

or

image.png

Step 4: Upload the Image

You can upload the image by either:

- **Dragging and dropping** the image from the left panel to the right panel, **or**
 - **Right-clicking** the image and selecting **Upload**.
-

Step 5: Verify the Upload

After the upload completes:

- The image should appear in the **right panel**.
- Open C:\FTPShare in File Explorer and confirm the image file is present.
