

Q- Create an Access Control List (ACL) on your router to block access to a specific website (for example, www.youtube.com) from your Wi-Fi network, and test if the block is working by trying to access the site from a connected device.

To configure an access control policy on a **WRT300N wireless router** to block access to a specific website, such as www.youtube.com, and verify that the website is blocked from a connected device.

Parameter	Configuration
Router	WRT300N
Access Restriction	Enabled
Policy Name	Block YouTube
Website to Block	youtube.com
Connected Device	Laptop
Connection	Wireless

Procedure

1. Open **Cisco Packet Tracer**.
2. Add a **WRT300N Wireless Router** and a **Laptop**.
3. Connect the laptop to the WRT300N using its wireless network.
4. Open the **WRT300N → GUI**.
5. Go to **Access Restrictions**.
6. Enable the **Internet Access Policy**.
7. Create a new policy named **Block YouTube**.
8. Select the laptop as the device to which the policy will apply.
9. Under **Website Blocking by URL Address**, enter:

youtube.com

10. Save the settings.
11. Open the laptop's **Web Browser**.
12. Try to access:

http://www.youtube.com

13. Verify that access to the specified website is blocked.

Result

The **WRT300N wireless router's Access Restriction feature was successfully configured** to block youtube.com. The connected laptop was unable to access the specified website after the restriction was enabled, confirming that the website-blocking policy was active.
