

Install Ubuntu on Windows Using VirtualBox

Step 1: Download Ubuntu

1. Open:
 - [Ubuntu Desktop Download](#)
 2. Download the latest **Ubuntu LTS** version (ISO file, about 5–6 GB).
-

Step 2: Download VirtualBox

1. Open:
 - [VirtualBox Downloads](#)
 2. Click **Windows hosts** to download VirtualBox.
-

Step 3: Install VirtualBox on Windows

1. Double-click the downloaded VirtualBox .exe file.
 2. Click **Next** through the installation wizard.
 3. Accept any security or network prompts.
 4. Click **Install**.
 5. Click **Finish** to launch VirtualBox.
-

Step 4: Create a New Virtual Machine

1. Open VirtualBox.
 2. Click **New**.
 3. Enter:
 - Name: Ubuntu
 4. Click **Next**.
-

Step 5: Allocate Resources

Memory (RAM):

- If your PC has 8 GB RAM → Allocate 4096 MB (4 GB)
- If your PC has 16 GB RAM → Allocate 6144–8192 MB

Virtual Hard Disk:

- Create a virtual hard disk.
- Size: **25 GB or more.**
- Type: **VDI**
- Storage: **Dynamically Allocated**

Click **Finish**.

Step 6: Attach the Ubuntu ISO

1. Select your Ubuntu VM.
 2. Click **Settings → Storage**.
 3. Select the empty optical drive.
 4. Click the disk icon → **Choose a Disk File**.
 5. Select the Ubuntu ISO you downloaded.
 6. Click **OK**.
-

Step 7: Start Ubuntu Installation

1. Click **Start**.
 2. Ubuntu will boot from the ISO.
 3. Select **Install Ubuntu**.
-

Step 8: Install Ubuntu

1. Choose your language.
2. Select your keyboard layout.

3. Choose **Normal Installation**.
4. Check **Download updates while installing**.
5. Click **Continue**.

When asked about disk setup:

- Select **Erase disk and install Ubuntu**.

This only affects the virtual hard disk inside VirtualBox, **not your Windows installation**.

Click **Install Now** and continue.

Step 9: Create Your Account

Enter:

- Your name
- Username
- Password

Click **Continue**.

Step 10: Complete Installation

Wait 10–30 minutes for installation to finish.
