

Router

Identified Components

1. Power Port

- **Position:** Usually located on the **back panel**, at one end.
- **Purpose:** Connects the router to its power adapter to supply electricity.

2. Ethernet Port 1 (WAN/Internet)

- **Position:** On the **back panel**, often colored **blue** or labeled **Internet/WAN**.

- **Purpose:** Connects the router to the modem or Internet service provider.

3. Ethernet Port 2 (LAN)

- **Position:** Next to the WAN port, usually one of several **yellow** LAN ports.
- **Purpose:** Connects wired devices such as computers, printers, or switches.

4. LED Indicators

- **Position:** Usually on the **front** or **top** of the router.
 - **Purpose:**
 - **Power LED:** Indicates the router is powered on.
 - **Internet LED:** Shows Internet connectivity.
 - **Wi-Fi LED:** Indicates wireless network activity.
 - **LAN LEDs:** Blink when data is transmitted through Ethernet ports.
-

Network Switch

Identified Components

1. Power Port

- **Position:** Usually on the **rear** or **side** of the switch.
- **Purpose:** Connects the switch to its power supply.

2. Ethernet Port 1

- **Position:** Front panel, typically the **leftmost RJ-45 port**.
- **Purpose:** Connects a computer, router, or another network device.

3. Ethernet Port 2

- **Position:** Adjacent to Port 1 on the front panel.
- **Purpose:** Connects another network device to the local network.

4. LED Indicators

- **Position:** Above or beside each Ethernet port and near the power indicator.
- **Purpose:**
 - **Power LED:** Confirms the switch is powered on.
 - **Link/Activity LEDs:** Light up when a device is connected and blink during data transmission.
 - **Speed LEDs (if available):** Indicate connection speed (e.g., 100 Mbps or 1 Gbps).

Device	Component	Position	Purpose
Router	Power Port	Back panel	Supplies power to the router
Router	WAN Ethernet Port	Back panel	Connects to the modem/Internet
Router	LAN Ethernet Port	Back panel	Connects wired devices

Device	Component	Position	Purpose
Router	LED Indicators	Front/Top	Show power, Internet, Wi-Fi, and network activity
Switch	Power Port	Rear/Side	Supplies power to the switch
Switch	Ethernet Port 1	Front panel	Connects network devices
Switch	Ethernet Port 2	Front panel	Connects additional network devices
Switch	LED Indicators	Above/Beside ports	Show power, link status, and data activity
